

FROG IN HOOPS PUZZLE

Two (2) learning teams will get together and attempt to complete the frog in hoops activity before the other teams. Start the activity with 7 hoops. Three (3) members of a learning team on one end face three (3) members of another learning team on the other with one (1) hoop between them. The objective is to move all team members to the hoops occupied by the other team facing you.

Rules are:

- One person can move one spot at a time
- You can only move around one person at a time
- You can only move forward

To complete the activity, groups must be able to complete the puzzle using hula hoops at the front of the class. Give each group 10 minutes before being asked to complete the puzzle in front of the class.

Students can use the website <http://www.digyourowngrave.com/frog-jumping-puzzle/> to help them practice.
